

TOPIC

Computers – Section IV – Question 8

QUESTION

The spreadsheet is given below

	A	B	C	D	E
1	1	2	7		
2	3	4	13		
3	5	6	11		
4			17		
5					

If formula $A3+\$C\$1*B2$ is used in A4 and then copied to A5, the value in A5 would be

- (A) 33
- (B) 75
- (C) 81
- (D) 111

HINT

Note what the \$ means in the formula.

SOLUTION

The formula when put in A4 would give us

$$A3+C1*B2=5+7*4=33$$

Then it is copied to A5, it would become (*note that the \$C\$1 does not change its location on copying*)

$$A4+C1*B3=33+7*6=75$$

ANSWER

(B)
