Engineering Probability and Statistics – Section II – Question 1

**QUESTION**

A card is randomly selected from a deck of 52 playing cards (that is, the two jokers are excluded). The probability that the selected card is a heart or a jack most nearly is

    (A) 1/4
    (B) 3/10
    (C) 2/5
    (D) 4/13
